Dear Mr. Talon:

I have reviewed the information contained in your agency medical file in support of your May 25, application for airman medical certification. You have a history of myofascial pain syndrome and the use of Valium. These findings are incompatible with aviation safety. I have determined, therefore, that you are ineligible for airman medical certification under sections 67.113(b) and (c); 67.213(b) and (c); and 67.313(b) and (c) of the Federal Aviation Regulations, 14 CFR part 67.

If you wish to pursue the denial of your application for a medical certificate, you may file a petition with the National Transportation Safety Board (NTSB); 490 L'Enfant Plaza East, SW.; Washington, DC 20594. This petition must be filed within 60 days of the receipt of this letter and be in accordance with the provisions of 49 U.S.C. § 44703. The NTSB review is based, in part, on the NTSB Rules of Practice in Air Safety Proceedings, 49 CFR part 821.

You have also been given consideration for the special issuance of a medical certificate under 14 CFR § 67.401. I have determined, however, that your medical condition precludes the safe performance of airman duties under any condition that could reasonably be prescribed.

I realize your disappointment and regret that my decision with respect to your certification is not favorable.

Sincerely,

  
Jon L. Jordan, M.D.  
Federal Air Surgeon
